Ithaca, NY 14850

Applied-AI builder shipping LLM and retrieval systems for financial-services and enterprise clients. Co-founder of an AI-native startup and VP of a student tech consultancy delivering for clients including Cisco and Investcorp. Based in Bahrain.

Education

Cornell University, College of Arts and Sciences

Bachelor of Arts in Computer Science

Courses: OOP and Data Structures, Discrete Math, Functional Programming

Ithaca, NY

Expected May 2029

GPA: 3.89/4.00

Technical Skills

- **AI and Applied ML:** LLMs, RAG, GraphRAG, agentic pipelines, model evaluation, LangChain
- **Cloud and Infrastructure:** Azure, Docker, Supabase, Vector Databases, PostgreSQL
- **Backend and Full-Stack:** Python, FastAPI, React, Java, OCaml
- **Languages:** English, Urdu, Spanish, French

Professional Experience

Cornell GenAI Club

Vice President, Student Tech Consultancy

September 2025 – Present

Ithaca, NY

- Led end-to-end delivery for enterprise engagements with Cisco Systems and Investcorp, owning discovery, scoping, and the delivery pipeline; scaled the student consultancy to \$7k+ first-year revenue, with Haas F1 Team in late-stage talks for next semester.
- Architected a production FastAPI/RAG pipeline that automated unstructured financial-data extraction into schema-validated JSON for an enterprise financial client; managed a 25-member developer team across active engagements.

Zybit

Co-Founder and CTO

April 2026 – Present

Ithaca, NY

- Co-founded an AI-native voice platform for dental practices: ambient clinical charting, automated CDT coding, and revenue-leak detection, writing structured notes directly into Open Dental through a Deepgram and Azure OpenAI pipeline.
- Onboarding 3 design-partner clinics ahead of a mid-July launch; projected to recover an average 10–15% of monthly revenue per practice by closing undercoding and billing gaps.

Akash Network

Student Ambassador

September 2025 – Present

Ithaca, NY

- Authored and merged PR #782 to Akash's official marketplace repository, contributing an autoresearch deployment template adopted by the developer community; built AI workflow automations that drove community growth.
- Designed and ran a 24-configuration study on Byzantine fault-tolerance in federated LLM training, implementing a novel reputation-weighted aggregation defense on Akash GPU infrastructure.

Gulf Intel

Co-Founder

September 2024 – December 2025

Bahrain

- Built agentic lead-qualification workflows and multilingual marketing funnels for 7+ Bahrain businesses, driving an average +80% revenue lift through AI-enabled operational systems.

RIIGTech

AI Engineer

June 2024 – July 2024

Virginia, Remote

- Built a GraphRAG retrieval and summarization system for complex regulatory and legal documents; implemented factual-accuracy and citation-traceability evaluation pipelines and presented findings to C-suite leadership.

Projects

CommitMint

Solana Student Hackathon, 3rd Place (\$2,500) | Solana, Anchor, Privy, Moonpay

December 2025

Ithaca, NY

- Architected a decentralized commitment platform on Solana with an autonomous AI verification agent; integrated Privy and Moonpay for frictionless fiat-to-crypto onboarding, abstracting blockchain complexity for mainstream users.

Compute Swarm

x402 Hackathon | FastAPI, Docker, Rust, x402 Base Protocol

January 2026

Bahrain

- Built a P2P GPU marketplace letting AI agents autonomously rent compute via x402 Base Protocol; full-stack across FastAPI backend, P2P tunneling, seller dashboard, buyer CLI, and isolated Docker sandboxing.

Activities

Alpha Kappa Psi, Beta Lambda Chapter

New Member, Cornell's leading professional business fraternity

2026 – Present

Ithaca, NY

Interests

Boxing, Tennis, Soccer, Bass Guitar, Formula 1, Traveling, Movies, South Asian Dramas, Jazz and Rock Music
