EDUCATION

Cornell University, College of Arts & Sciences

Bachelor of Arts in Computer Science

Courses: OOP & Data Structures (Java), Discrete Structures · GPA: 3.89 / 4.00

Ithaca, NY

Expected May 2029

TECHNICAL SKILLS

Back-end: Python, Java, FastAPI, Rust

Front-end: Flutter, React, Streamlit

Cloud: Supabase, Docker, AWS, Vector Databases, PostgreSQL, AkashNet

AI & Data: Langchain, Hugging Face, OCR, RAG, Scikit-learn, PyTorch, NLP

Languages: English (Native), Urdu (Native), Spanish (Conversational), French (Conversational)

RELEVANT EXPERIENCE

Cornell GenAI Club — Bridge Marketplace Project

Vice President

Ithaca, NY

Sep 2025 – Present

- Lead operations for a 25-member developer agency, securing enterprise partnerships to build a \$5k+ semesterly revenue pipeline across 3 active client projects.
- Manage talent across 4 workstreams, coordinating weekly sprints that maintained 100% on-time deliverable handoffs over 2 consecutive semesters.

Cornell Blockchain Accelerator

Member

Ithaca, NY

2025 – Present

- Selected for competitive 20-member cohort supporting 5+ blockchain startups with execution strategy, pitch preparation, and investor demo-day readiness.
- Partnered with 3 founder teams to refine product-market fit, design token-economy models, and evaluate smart-contract prototypes ahead of public launch.

RIIGTech

AI Engineer

Virginia, Remote

Jun 2024 – Jul 2024

- Built and deployed an AI summarization and GraphRAG retrieval system processing 500+ legal documents, reducing manual review time by an estimated 60%.
- Implemented evaluation pipelines across 10+ LLM benchmarks, improving model factual accuracy and citation traceability scores by 25%.
- Presented findings across 2 C-suite board sessions, directly shaping the firm's AI compliance strategy and a 6-month implementation roadmap.

Gulf Intel

Co-Founder

Bahrain

Sep 2024 – Present

- Transitioned 7+ local businesses from manual operations to AI-enabled online systems, cutting average overhead by 35% and onboarding 500+ new end-customers.
- Built multilingual chatbots and agentic workflows in 3 languages, setting up delivery networks that drove an average +80% revenue increase per client.

PROJECTS

CommitMint

Solana Student Hackathon — 1st Place (\$2,500)

Ithaca, NY

Dec 2025

- Architected a decentralized commitment platform enabling users to stake SOL against verifiable goals, processing \$3,000+ in on-chain transactions across 50+ beta testers within 48 hours.
- Developed an AI verification agent autonomously auditing user progress, achieving 92% accuracy against ground-truth data across 200+ challenge submissions.

- Streamlined onboarding via Privy embedded wallets and Moonpay Apple Pay, reducing average crypto setup time from 8 minutes to under 90 seconds for non-crypto users.

Compute Swarm

Bahrain

x402 Hackathon Project

Jan 2026

- Built a P2P GPU marketplace enabling AI agents to rent compute via x402 Base Protocol, supporting 10+ concurrent node connections and 3 active sellers during live demo.
- Delivered full-stack system — FastAPI backend, P2P tunneling, seller dashboard, buyer CLI — end-to-end in under 36 hours across a 3-person team.
- Implemented Docker sandboxing with network isolation and LoRA fine-tuning templates, cutting GPU provisioning time by 70% vs. manual configuration.

ACTIVITIES

Akash Network

Ithaca, NY

Student Ambassador

Jan 2026 – Present

- Selected for Spring 2026 cohort of 15 ambassadors to lead technical community growth at Cornell, hosting 4+ workshops on decentralized infrastructure for 30+ attendees each.
- Grew local developer community by 40+ members in 2 months, organizing build sessions and co-authoring 3 technical guides on decentralized hardware deployment.
